

Railsware Referral Program

How it Works

When you refer us to someone who we end up working together with we compensate you with an amount equaling **5%** of the first 12 months contract work + **2%** of all subsequent years we work with your referral.

For example on a 12 months contract with a team of 2 Engineers, Product Manager and Designer 5% referral compensation would be around **\$25k-30k**. And if we'll end up working with a bigger team, your compensation will grow proportionately.

Referral compensation can be done either on your personal account or as engineering credit if you are an active Railsware client.

Please make introductions to contact@railsware.com and we'll start a process from there.

About Railsware

Today Railsware is a Product Studio with two main focuses – **services** and **products**. These directions are integrally connected and complement each other.

From startups to enterprises, we build web and mobile solutions all over the world relying on our craft, time-tested tools, and full commitment that lies in the highest level of ownership and responsibility. Railsware integrates into client business as a cohesive team of product managers, developers, and designers. We contribute all our knowledge to bring value to the end-users and ensure your steady growth.

We are proud of every product we create.
